

EP30 Internal Partition System

An internal partitioning system, capable to support full height glazed or transoms solutions. It provides accommodation to several single glazed infills as well as non-transparent panels. It can incorporate cable infrastructure. Ideal for open space configurations.

Performance

Acoustic performance: up to **42 dB**

Impact resistance: up to **Class 5**

Technical features

Min. system width: 33mm

Max. module width: 1.200mm

Max. module height: 2.800mm

Infill thickness: 4mm ÷ 10mm

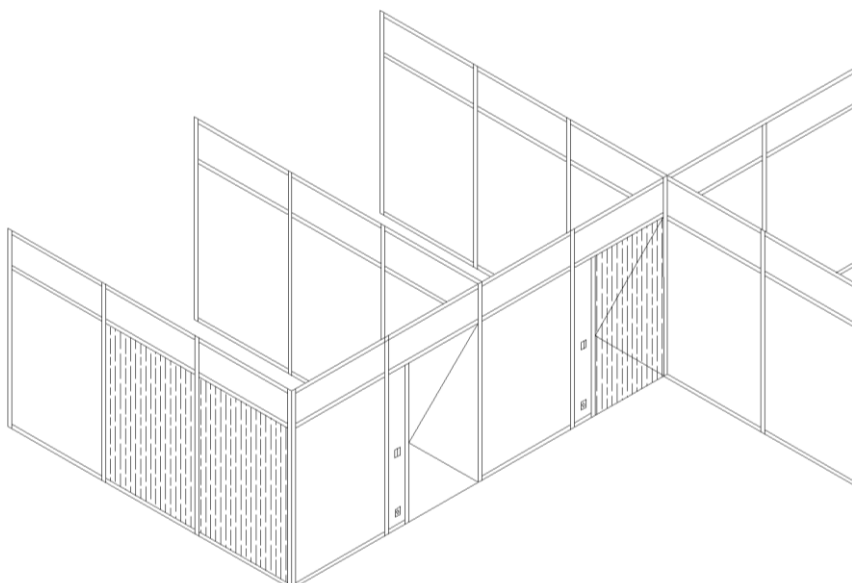

Hardware

Max. weight: 120kg

Integration with venetian blinds in the cavity

Complementary insulation

Typologies

Surface treatment

QUALICOAT – Powder coating

QUALANOD - Anodising

QUALIDECO – Wood effects

Production certificates

- EN ISO 9001
- EN ISO 14001
- OHSAS 18001
