

EB49

GLASS BALUSTRADE SYSTEM

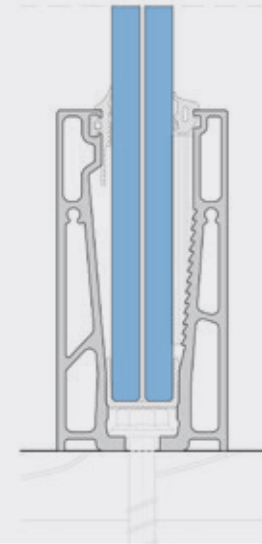

A light frameless glass balustrade system, with aluminium base without additional vertical support. It is designed in modern, straight lines and accommodates various types of infills. The base design prevents from stepping on it. It can be installed on or embedded to the floor level. Ideal for areas with limited crowd concentration.

TECHNICAL FEATURES

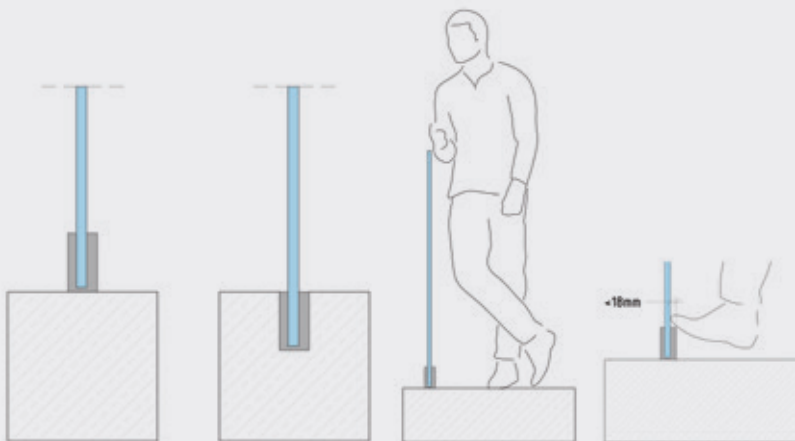

| | |
|-----------------|-----------------|
| Base width: | 49mm |
| Base height: | 98mm |
| Glazing infill: | 13,5mm / 17,5mm |
